NUMBER 1 March

SPECIAL ISSUE IN MEMORY OF GERD BUCHDAHL: KANTIAN PHILOSOPHY AND THE SCIENCES

Editorial preface	1	
Articles		
ERIC WATKINS	5	Forces and causes in Kant's early pre-Critical writings
MICHAEL FRIEDMAN	29	Transcendental philosophy and mathematical physics
LISA SHABEL	45	Reflections on Kant's concept (and intuition) of space
MARTIN CARRIER	59	How to tell causes from effects: Kant's causal theory of time and modern approaches
JOHN H. ZAMMITO	73	'This inscrutable *principle* of an original *organization*': epigenesis and 'looseness of fit' in Kant's philosophy of science
JOAN STEIGERWALD	111	The dynamics of reason and its elusive object in Kant, Fichte and Schelling
FREDERICK BEISER	135	Hegel and *Naturphilosophie*
RUDOLF A. MAKKREEL	149	The cognition–knowledge distinction in Kant and Dilthey and the implications for psychology and self-understanding
ALAN RICHARDSON	165	The geometry of knowledge: Lewis, Becker, Carnap and the formalization of philosophy in the 1920s
NICK JARDINE	183	Hermeneutic strategies in Gerd Buchdahl's Kantian philosophy of science
JILL WHITELOCK, JASON M. RAMPELT AND NICK JARDINE	209	Gerd Buchdahl's writings in history and philosophy of science: a listing of publications, unpublished works, and annotated books

NUMBER 2 June

Articles

Paolo Palmieri	229	Mental models in Galileo's early mathematization of nature
Athanassios Raftopoulos	265	Cartesian analysis and synthesis
Maria Rosa Antognazza	309	Leibniz and the post-Copernican universe. Koyré revisited
Michael Jacovides	329	Locke's construction of the idea of power
Prajit K. Basu	351	Theory-ladenness of evidence: a case study from history of chemistry
Brendan Larvor	369	Why did Kuhn's *Structure of scientific revolutions* cause a fuss?
Robert Nola, Gürol Irzik	391	Incredulity towards Lyotard: a critique of a postmodernist account of science and knowledge

Essay reviews

Eleanor Robson	423	Satisfaction, subversion, and the reluctant reader: some thoughts on writing accessible history of ancient mathematics
Theodore Arabatzis	431	Towards a historical ontology?

NUMBER 3 September

Articles

KARIN TYBJERG	443	Wonder-making and philosophical wonder in Hero of Alexandria
EDWARD SLOWIK	467	Conventionalism in Reid's 'geometry of visibles'
XIANG CHEN	491	Why did John Herschel fail to understand polarization? The differences between object and event concepts
OLIVIER DARRIGOL	515	Number and measure: Hermann von Helmholtz at the crossroads of mathematics, physics, and psychology
JOHN O'NEILL	575	Unified science as political philosophy: positivism, pluralism and liberalism
GUALTIERO PICCININI	597	Epistemic divergence and the publicity of scientific methods
ROMAN FRIGG	613	Self-organised criticality—what it is and what it isn't
JAMES W. MCALLISTER	633	Algorithmic randomness in empirical data
NICK TOSH	647	Anachronism and retrospective explanation: in defence of a present-centred history of science

NUMBER 4 December

Articles

H. M. Collins	661	Lead into gold: the science of finding nothing
Lynnette Khong	693	Actants and enframing: Heidegger and Latour on technology
Joachim Schummer	705	The notion of nature in chemistry
Tad M. Schmaltz	737	Cartesian causation: body–body interaction, motion, and eternal truths
E. B. Davies	763	The Newtonian Myth
José Luís Cardoso	781	From natural history to political economy: the enlightened mission of Domenico Vandelli in late eighteenth-century Portugal

Essay reviews

Michael Hunter	805	Whither editing?
Peter Dear	821	The ideology of modern science
	829	Books in the history and philosophy of science
	I	2003 Contents and Author Index
